

# LayerWeaver Setup Guide

---

~ Adding the Auto-Analysis Plugin to Krita ~

## 1. Locating the Directory

Paste the following into the address bar of File Explorer and navigate there: %APPDATA%\krita\pykrita

## 2. Copying Files

Copy **both** the downloaded **LayerWeaver.desktop** file and the **LayerWeaver** folder into the directory above.

## 3. Enabling in Krita

1. Launch Krita and open **Settings** → **Configure Krita...** → **Python Plugin Manager**.
2. Check the box for **LayerWeaver**.
3. **[REQUIRED] Completely close Krita and restart it.**

If LayerWeaver appears under the "Scripts" menu in the Tools menu, you are ready to go.
